Lateef - Documentation

Thank you for your interest in the Lateef font. Lateef includes near-complete support for Unicode 13.0 Arabic ranges (excluding the Arabic Presentation Forms blocks, which are not recommended for normal use).

This documentation is a set of HTML pages that can be viewed in any modern web browser. PDF versions of these pages are also provided. This content, plus download links and a contact form, are available from the Lateef site.

- About -- Information about this project and SIL International
- Resources -- Help with installation and use
- FAQ -- Common questions and answers
- Design -- History and background of the design
- Character set support -- Details of Unicode characters that are supported
- Type Sample -- Type sample demonstrating all the characters in this font
- Font features -- Using smart font features
- Rendering the Allah ligature -- Special rules for rendering the Allah ligature
- Support -- How to get additional support
- Developer information -- How to modify and build the fonts
- Versions -- Sources for alternate versions
- Version history -- Complete version history
- Announcement -- Source for News announcement

Additional information is also provided in other project files: README.txt, OFL.txt, OFL-FAQ.txt, and FONTLOG.txt.
